- Improves business agility with a platform built for growth

Maintain Your Capital & Protect Your Investment with ShoreTel Financial Solutions

Visit www.shoretel.com or contact your local representative for more details.

ShoreTel® is a leading provider of unified communications (UC) systems with a history of satisfied customers that goes back to 1998. Now the power of ShoreTel Pure IP communications is available in a solution tailored to meet the needs of small businesses.

ShoreTel Small Business Edition (SBE) easily scales to meet the needs of small businesses focused on growth, providing up to 50 users at one location with high-performance, Pure IP communications. ShoreTel SBE was created to help small business owners empower employees with productivity-boosting UC applications, while delivering exceptional ease of management and low total cost of ownership. Most standard functions, such as adding or changing phones, and moving users, can be done by anyone with basic IT knowledge and skills.

Enterprise-class Pure IP communications

ShoreTel SBE is an integrated package that includes the hardware and software necessary for enterprise-class benefits in a small business environment:

- **Ease of management:** A single-view, Web-based interface centralizes the entire system so it can be managed from anywhere on the network, increasing control and lowering total cost of ownership.
- **The power of Pure IP:** ShoreTel Pure IP communications give users new freedom and flexibility with efficient call handling capabilities and mobility features that allow them to connect with more callers.
- **Ease of use:** The most intuitive interface in the industry improves communications and increases productivity.
- **Distributed reliability:** ShoreTel UC systems are built on a distributed architecture that helps ensure 99.999 percent reliability—the most stringent enterprise system availability requirement—with no single point of failure. ShoreGear® Voice Switches use an embedded, real-time operating system, eliminating the requirement

for external, Microsoft Windows-based servers to process calls. For maximum availability, the processors that power ShoreGear Voice Switches do not contain mechanical disk drives, eliminating the single most common point of system failure.

If redundancy is required, a second ShoreGear Voice Switch can be added easily and quickly at the site, delivering the only redundant call control available for the small business market.

- **Seamless scalability:** ShoreTel SBE can be easily integrated with your current communications infrastructure, and offers flexible migration options. And, if your needs expand beyond ShoreTel SBE, a simple software upgrade allows your ShoreTel UC system to scale further—no hardware change required.

A complete solution

ShoreTel SBE is an integrated package that provides everything you need to get started quickly:

- 1 ShoreGear Voice Switch
- 10 Extension and mailbox licenses
- 1 Extension only license
- 11 ShoreWare® Personal Call Manager licenses
- 1 ShoreWare Operator Call Manager license
- Optional preconfigured server for management and advanced applications

Simply select the base package, depending on your system size requirements, and choose from the optional line of telephones to add to the system. ShoreTel ShorePhones®, ShoreTel Converged Conferencing, and ShoreWare Contact Center Workgroups Edition are additional options available.

High-performance, ergonomically designed phones

ShoreTel ShorePhone IP Telephones are ergonomically designed for both comfort and visual impact. Their leading-edge designs, in black or silver, are available in a wide variety of configurations. ShorePhone IP Telephones provide high fidelity audio, capable of delivering seven octaves of the human voice. Built-in functionality includes speakerphone, caller ID, message waiting, as well as services such as transfer, conference, pick-up, park, intercom and bridged call appearance.

ShoreTel offers from a wide range of award-winning ShorePhone IP Telephones:

- The cost-effective, one-line IP 110 or IP 115 for lobbies and open areas
- The twelve-line IP 212k for key-system environments
- The three-line IP 230/IP 230g* for office and general users
- The six-line IP 265 color phone for demanding professionals
- The six-line IP 560/IP 560g* for executives and assistants
- The six-line IP 565g color phone with Bluetooth headset support for executives and assistants

Up to four ShorePhone BB 24 programmable button boxes can be added to any phone (except the IP 110 and IP 115), each delivering 24 additional buttons important for operators and assistants. This means you only purchase the phones you need now, but still have the option of adding phones later.

Voicemail and automated attendant

Voicemail and automated attendant require no additional hardware and consume no ports. Their storage capacity is limited only by the size of the server's hard disk. You can record personal greetings and manage mailboxes from your desktop software or from any telephone, as well as a Microsoft Outlook inbox. Saved messages can be played on multimedia PCs, forwarded to others and embedded in other documents.

Productivity tools

ShoreTel SBE provides a suite of productivity tools, including desktop call control and unified messaging with Microsoft Outlook, as well as features for mobile and remote workers such as Find Me, call handling modes, message notification, SoftPhone and Office Anywhere.

Small Business Edition Integrated Server specifications

- Celeron 1.8 GHz CPU
- 2 GB RAM
- 80 GB hard disk or better
- DVD-ROM drive
- 10/100 Ethernet NIC
- Microsoft® Windows® Server 2003, for Telecommunications Systems

* The IP 230g and IP 560g add Gigabit Ethernet support for users with Gigabit desktop needs.
